

IMPACT™ TECHNOLOGY

Now there is a flame retardant shower curtain that provides protection against splashing, stains, and bacteria while complying with all U.S. fire code regulations.

The product of innovative design and advanced engineering, IMPACT™ technology is not a coating. Fluid repellent, the protective fibers that are woven into the curtain create an invisible shield that prevents overspray--keeping floors dry and bacteria free. The weighted bottom sewn along the full length of the hem, further protects against water leakage common to standard barrier-free showers--enhancing safety while reducing costs associated with maintenance and liability.

Fabrics that IMPACT your Life.

Shower Curtain with IMPACT TECHNOLOGY™

COLOR SELECTION

**IMPACT'S™ water resistant fabric is machine washable for reduced laundering expenses & extended fabric life.*

Your Challenge

- Finding fabrics that protect against staining
- Lowering your laundering costs
- Reducing bacterial build up in your facility
- Meeting all code regulations
- Saving money by extending fabric life
- Keeping your floors safe and dry

Our Solution

Creating Products that are:

- Stain Resistant
- Splash Resistant
- Bacterial Resistant
- Flame Resistant
- Heavy Tape Weight

The Result

- Products stay cleaner---longer
- Products do not need to be replaced as often
- Products designed to meet code and satisfy real world needs
- Decreased "hanging " time for replacing/washing curtains
- Seamless construction that saves 10-15% in fabric and labor
- Safer and dryer floors
